

Anti-Aging Health Check-up

Value Added Service (VAS) for Pre-Retiree Customers

Why Anti Aging Health Check-up?

- **Increasing age is considered as a risk factor in the occurrence of disease**
- **It discovers signs of risk at an early stage. Therefore it aims at early discovery and early treatment**
- **It promotes health and longevity through medical intervention such as various tests and health guidance before the occurrence of problems.**
- **It positions aging as a preparatory state for the occurrence of disease and aims to mitigate that state before problems occur.**

The purpose is to extend healthy life expectancy as well as longevity
